BREEZE 2026 REVIEW

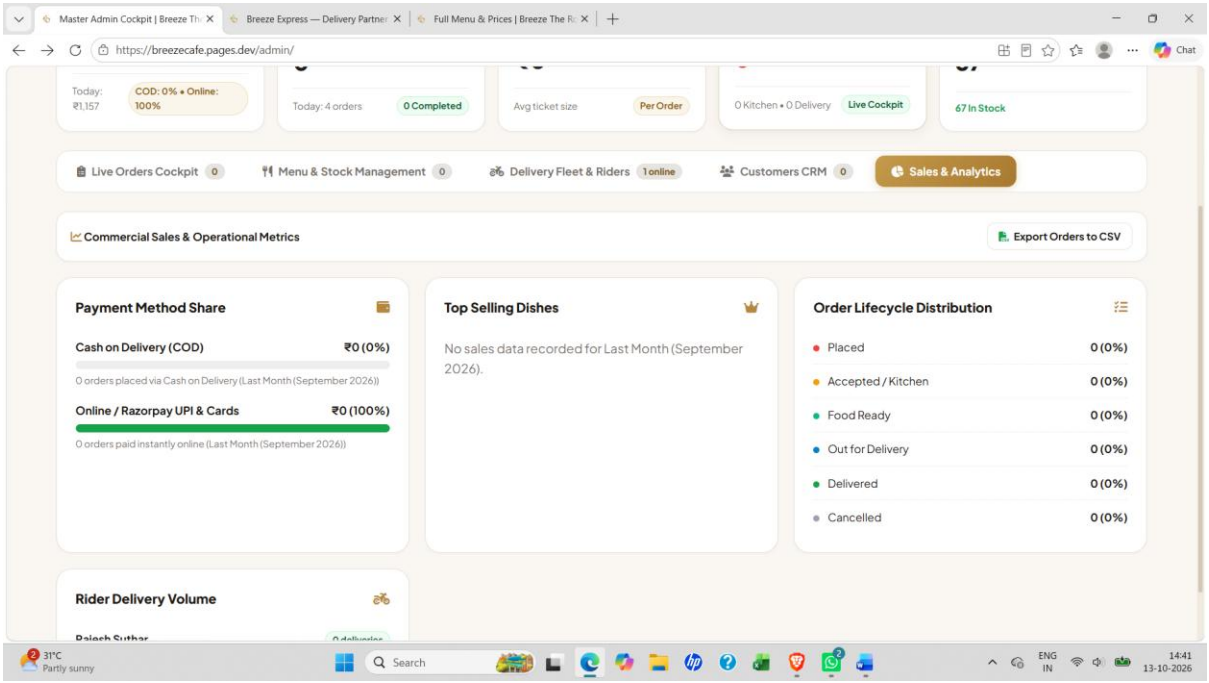

LAPTOP –

ADMIN-

- Selected last month, active live orders are seen.
- Cant select test orders after 2 orders.

- When I selected last months payment method share, online payment was 100% with 0 orders

- Cant select ‘view period report’ in admin portal, sales& analytics tab.

- If I selected take away, will it assign to a driver? Isn't take away supposed to be self-collecting?? When I checked **Commercial Sales & Operational Metrics** excel data, there's no address but it is getting assigned to the driver if I select assign to driver. There shouldn't be that option if its takeaway order.
-

CUSTOMER-

- Cant open visual gallery photos.
- Can see that store is open even when I shut down store manually in admin portal.
- When I reserved a table, where will it appear in admin portal?
-

DELIVERY-

- When I click order delivered and collect cash right after assigning to a driver its not accepting. It only accepted after I click delivered in admin portal.
- Even after logging out, still showing online in admin portal.
-
